DIPLOMATE — AMERICAN BOARD OF ORAL AND MAXILLOFACIAL SURGEONS
FELLOW — AMERICAN ASSOCIATION OF ORAL AND MAXILLOFACIAL SURGEONS

February 17, 1994

To whom it may concern:

Jeffrey Dacks was retained as the architect for my 3,500 square foot professional building which was constructed during 1993. He was responsible for the site layout, building design, floor plan, all building systems, as well as interior detail.

From its very conception, Mr. Dacks was heavily involved in every detail of the design and construction of this building. He spent many hours reviewing and researching code requirements as well as the A.D.A. building edicts necessary for construction. He also prepared drawings and testified at numerous zoning hearings at the township and county levels. His knowledge and professionalism at these meetings were instrumental in securing zoning approval.

Jeff's dedication to this project was evident in the detail of his drawings and the painstaking amount of time he spent in pre-design research to insure that each room was designed to fully utilize its potential for its intended use. Additionally, his in-depth study of my practice resulted in a floor plan that has produced a highly efficient patient flow pattern. Jeff also spent a great deal of time familiarizing himself with the unusual requirements of medical gases and surgical and dental equipment, thereby insuring their proper installation and function. His exceptional creative talents are represented by the outstanding appearance of the building, both interior and exterior. Jeff's knowledge of building systems was also impressive as he designed exterior overhangs, window placements, insulation materials, and earth berms for maximum energy conservation. Finally, he was always available to me and the contractors for consultation and was regularly on the construction site to insure proper execution of his design.

Jeff Dacks has proven to be a very talented and knowledgeable architect whose attention to detail is exceptional. He is a highly dedicated professional who takes great pride in his work. He works extremely well with all of the many people who are involved in the building process. He has my highest recommendation for any architectural project.

Sincerely yours,

A handwritten signature in blue ink, appearing to read "Twesme".
